PROFESSIONAL SUMMARY

Entry-level SOC Analyst with hands-on experience building a Windows and Linux security lab, collecting Sysmon and Windows Event Logs, and analyzing security events in Splunk. Skilled in log analysis, phishing investigation, IOC identification, MITRE ATT&CK mapping, and Linux troubleshooting. Strong background in analyzing large datasets, investigating technical issues, and documenting findings. Seeking an SOC Analyst L1 role focused on security monitoring, alert triage, and incident response support.

CORE SKILLS

- **Security monitoring:** SIEM, alert triage, incident investigation, IOC analysis, phishing analysis, threat detection, MITRE ATT&CK, incident documentation.
- **SIEM and logging:** Splunk, SPL, Windows Event Logs, Sysmon, log correlation, dashboards.
- **Operating systems:** Windows 10/11, Linux, Ubuntu, Kali Linux, PowerShell basics.
- **Networking:** TCP/IP, DNS, HTTP/HTTPS, DHCP, SSH, VPN, firewalls, common ports and protocols

PROJECTS

- **Personal SOC Lab**

- Built a virtualized security lab using Kali Linux and Windows 11.
- Configured Sysmon and Windows logging to collect endpoint telemetry.
- Investigated process creation, authentication, PowerShell, and network-related events.
- Used MITRE ATT&CK techniques to classify observed attack behavior.
- Documented investigation timelines, indicators, findings, and recommended response actions.

- **Splunk SIEM Log Analysis**

- Ingested Windows Event Logs and Sysmon data into Splunk.
- Wrote SPL queries and created dashboards for failed-logon activity, suspicious PowerShell use, and privilege-escalation indicators.
- Correlated authentication, process, and endpoint events to support alert investigation.
- Documented detection logic, relevant event fields, false-positive considerations, and investigation results.

- **Phishing Email Investigation**

- Analyzed email headers, sender information, SPF/DKIM results, URLs, attachments, and indicators of compromise.
- Extracted suspicious domains, IP addresses, URLs, and file hashes from sample messages.
- Used reputation and sandboxing tools, where available, to assess potentially malicious indicators.
- Prepared an investigation report containing evidence, risk assessment, and recommended user or endpoint actions.

- **Major Project - Discovering RET- Kinase Inhibitors Targeting Anticancer Therapy.**

Jamia Millia Islamia, Jan 2022 - June 2022

- Identified natural compounds as potent inhibitors of RET kinase using virtual high-throughput screening and molecular dynamics simulation studies.
- Coordinated with instructors and fellow students and wrote reports for the dissertation and publication.
- **Minor Project – Bioactive Phytoconstituents as Potent Inhibitors of Tyrosine-Protein Kinase Yes (YES1)**
Jamia Millia Islamia, Sept 2021 - Dec 2021
- Identified natural compounds as potent inhibitors of YES1 kinase using virtual high-throughput screening and molecular dynamics simulation studies.
- Coordinated with instructors and fellow students and wrote reports for the dissertation and publication.

EXPERIENCE

- **Research Assistant** - Hassan Lab, Computational Biology Division, New Delhi
October 2022 - November 2025
- Worked extensively in Linux-based environments, troubleshooting command-line, software, and workflow issues.
- Automated repetitive analysis workflows with Python, improving consistency and reducing manual processing.
- Analyzed large datasets to identify anomalies, validate results, and investigate unexpected system behavior.
- Documented procedures, troubleshooting steps, findings, and reproducible technical workflows.
- Collaborated with researchers and students to resolve technical problems and communicate complex findings clearly.
- Co-authored technical manuscripts and maintained accurate research documentation.

EDUCATION

M.Sc. Bioinformatics - Jamia Millia Islamia, New Delhi | 2022 | CGPA: 9.61

B.Sc. (Hons.) Zoology - IGNOU, Delhi | 2020 | 70.35%

CERTIFICATIONS AND TRAINING

Cisco Networking Academy - Introduction to Cybersecurity

Cisco Networking Academy - Ethical Hacker

TryHackMe SOC Level 1 path - In progress

LANGUAGES

English, Hindi, Urdu
